

## **SPRING 2006 – ESTABLISHING NOBLE PVC PRODUCTS & MANUFACTURING INC.**

### **NOW OPEN FOR BUSINESS**

Having a firm idea in mind Dwaine began implementing his business model and vision. Sourcing the highest quality components was a major task. The goal was to have the ability to custom manufacture a competitive priced window, built to a customers' specifications with quality features being the standard not an "extra."

Months were spent identifying the necessary suppliers who could supply Noble with the quality components that would be used in manufacturing the Noble window system.

Modern equipment that would enable factory workers to be productive and produce the high standard that Noble demanded was identified and purchased.

Location, location, location!! A lot of high priced real estate was inspected, and the final decision was made to locate in Stonewall. Being located in a bedroom community provides a number of advantages in day to day operations, the main benefit is the low overhead which allows Noble the ability to produce a high quality product at a competitive price.

Savings are passed on to our customers. Noble does not make lofty or unsubstantiated claims to make a sale like "building the best windows" or make statements that "Our windows are better than competitors"; instead we point out features and benefits of our products. A number of various components that are used in our manufacturing process are included to provide our customers with a high quality and safe product they can enjoy for years to come. Time is spent answering all concerns a buyer may have, assisting by pointing out various options and configurations available, that only an experienced person can provide.

We welcome all enquiries, whether it is just one replacement window, a whole home renovation or new construction. The possibilities are only limited to your imagination, Noble takes pride in the ability to provide what competitors only promise. Quality products and quality workmanship is our standard, as a custom window manufacturer Noble recognizes there are no standard window sizes, only customers who deserve high value for their purchases, no matter whether it's a big job or a small job, all jobs are performed to the Noble standard.
