

2011 – NEW WEBSITE & DELIVERING NEW MULTI-LANGUAGE SERVICES

In the past 5 seasons Noble continued to grow and offer services at a standard other local window manufacturers have difficulty matching.

Keeping the traditional “high quality service” mandate at the forefront, Noble proudly introduced it’s ability to serve our diverse community in 6 languages. Not only is our new website a wealth of pertinent information, customers can now request our services in multiple languages. A request via email will inform Noble what language the customer wants to do business in, and Noble will contact the customer in their native language. Truly a first for the local window manufacturing industry!!

Service is provided in the following languages

- English
- French
- Spanish
- Ukrainian
- Italian
- Tagalog (Fillipino)

Credit card orders are now also accepted, with Visa, Mastercard, American Express or PayPal.

Our website is constantly undergoing changes and improvements, a gallery of before and after pictures has been added as well as some testimonials from satisfied customers. We are proud of the statements made by our customers that we are allowed to share, and firmly believe our customers deserve to receive the highest quality product for their money. We share information so our customers can make an informed decision on what really makes a window perform in our harsh climate. Performance, Quality and Safety is built into every Noble window.
