

FALL OF 2005 - A NOBLE IDEA IS CREATED

Having worked in the fenestration industry for over 12 years, Dwaine Catterson recognized the need to fill a niche that most window and door manufacturers ignored.

He was aware that most consumers were buying into hype and getting a lot of buzzwords with their product, and not necessarily getting full value for their hard earned dollar when they decided on making a purchase. His thoughts were to start a company that focused on quality and service, while providing customers high quality options not readily available or known. There would be no shortcuts in the manufacturing process or in the delivery of a high quality window product. No compromises would be acceptable.

WHY THE NOBLE NAME

In keeping with the high standards that this new custom window manufacturing company would be putting in place, a lot of thought was put into the name. NOBLE PVC PRODUCTS & MANUFACTURING INC. Was decided on, as the name implies more than one product as PVC is a versatile product and plans were already in mind for manufacturing more than windows.

The word NOBLE was chosen for its' definition, as it best describes the quality product and the service that would be provided.

NOBLE synonyms include the following:

extraordinary
distinguished
magnificent
impressive

The dictionary/Thesaurus adjective definition for NOBLE states the following:

admirable in dignity of conception, manner of expression, execution, or composition
very impressive or imposing in appearance; stately; magnificent
of an admirably high quality; notably superior; excellent
having excellent qualities or abilities

Thus the idea of having a company manufacture a high quality window product not available on the market by any other manufacturer was born, complete with a name that would best describe its method of operation.
